1. Features

- High power rating and low TCR.
- Low resistance and high precision (1%).
- Excellent reliability and suitable cost. Suitable for lead free soldering.
- High precision trimming implement.
- RoHS compliant & Halogen Free.

2. Applications

- Switching model power supply.
- Battery pack. Notebook, Tablet PC
- Test Instrument.
- Power Amplifier.

Note:

- (i) $I = \sqrt{P/R}$ or Max. Working Current.
- (ii) I: Working Current(A), P: Rated Power (W), R: Resistance Value(Ω)
- (iii) Please keep the surface temperature do not exceed 105℃ when working.
- (iv) *: Related number are depend on specific items only. **: TCR Hot ($+25^{\sim}+155^{\circ}$ C).
- (v) *** : R-value might be variance depend on soldering conditions and please consider this influence before use milli-ohm resistors, and strongly suggest use the recommendsolder pad to design your circuits.

10.Storage &. Handling

- ... Products are recommended to be used up within one year as ensured shelf life.

 Check solder ability in case shelf life extension is needed.
- ... To store products with following condition: Temperature:5 to 40° C; Humidity: 20 to 70% relative humidity.

Precaution for use:

The AEC-Q200 series resistors is mainly used on general automotive equipment without safety considerations. Please contact our company in advanced if you intend to use resistor for designing the equipment which may damage itself and the safety of third party. If necessary, please consider to add the protect circuit in devising process and obtaining fully safety evaluation. The contents of the acknowledgment is only used for our parent company, marketing subsidiaries and official marketing agents who purchase our products. Not applicable for theother nonofficial channels.
